

Technician Tech Ops Services – Technical Operations

Leiden, The Netherlands

About CellPoint

Engineering immune T cells from cancer patients using Chimeric Antigen Receptors (CARs) are a great invention from the last decade, eradicating tumors and providing durable remissions.

The mission and vision of CellPoint is to deliver the promise and feasibility of manufacturing autologous immunotherapies at the point-of-care into approved routine use. CellPoint is developing various CAR-T immunotherapies which have enormous potential for treating various cancers, using an innovative concept. One of the key hurdles in making these therapies more accessible to larger patient populations is the difficulty in manufacturing at-scale, robustly, and close to patients.

CellPoint utilizes an automated Lonza's Cocoon® Platform in combination with CellPoint's online xCellit Platform for workflow management to manufacture cell therapies at the point-of-care. This can lower manufacturing costs and decrease time to treatment, with vein-to-vein time lowered to as little as 5-7 days compared to the current industry standard of more than a month, and also circumvent complex logistics and thereby solving the key issues facing CART therapeutics.

About the role

As Technician Tech Ops Services you will join our technical operations team located in the Leiden Bio Science Park. Your main responsibilities will comprise of:

Equipment Lifecycle activities:

- Participate in the deployment of new instruments across the different sites
- Oversee the qualification of instrumentation for clinical purposes as well as internally at CP
- Review and assess technical documentation such as vendor IOQs and PQs
- Coordinate the calibration and maintenance of instruments for multiple sites including CP
- Drafting documentation such as SOPs and Protocols

Supply Chain activities:

- Assist with ordering materials
- Receive and process incoming materials
- Assist in the implementation and maintenance of the Kanban system
- Restock the labs with testing materials
- Coordinate shipments to multiple sites and contract labs
- Prepare material kits for shipping

We are a young and fast-growing company. New team members have the opportunity to actively shape their position and contribute to our mission, being part of a very motivated and multidisciplinary team.

Qualifications

- MBO level 4 or HBO in life sciences, biotechnology, or related discipline
- Working knowledge of cGMP and regulations is desirable
- Strong interpersonal, verbal and written communication skills

- Proficiency in Microsoft Office applications
- Ability to be flexible with changing priorities
- Self-driven and can-do mindset, without compromising quality and compliance

CellPoint offers

- Competitive salary
- Dynamic environment using cutting edge technologies, aiming to surpass the leaders in the field
- Great culture with strong emphasis on team performance and personal development
